

FOUR LANGUAGE SAMPLE CONFIGURATION

- 1 Presenter uses a wired or wireless microphone which can connect to self-powered PA or to existing sound system. One cable provides a feed to first interpreter's monitoring unit

- 2 The first Monitoring Unit receives the main feed from the sound system or directly from any existing microphone. In turn, each additional Monitoring Unit daisy-chains to the next Monitoring Unit with a standard XLR>XLR cable to share the main feed with as many Monitoring Units as your application calls for. Each interpreter's headset plugs into their corresponding Monitoring Unit.
- 4 Audience uses multi-channel receivers with comfortable dual headsets to tune into the language of their choosing. Each user has control of their volume levels

- 3 Interpreter microphones plug connects directly to of each T27 transmitter. Each transmitter is easily tuned to a unique frequency corresponding with the desired language. Adding an antenna upgrade ensures clear transmission and maximum range. Up to 1,000 feet.
- 5 Rugged military-grade case provides adjustable dividers for easy system management and unsurpassed protection.

This system can be configured easily to any number of receivers (up to 2,000) and can manage up to 8 languages

This system is designed to work as follows:

- 1 Easily connects to any existing PA system or any microphone directly with included Universal Connection Kit
- 2 With Monitor Unit unique daisy-chain feature to add on additional languages, each of your interpreters have the advantage of being able to listen directly to the presenter and can now hear better, concentrate, and overall do a better job of interpreting - imperative!
- 3 The interpreter's microphone easily connects to transmitter. Transmitter has a 500 foot range for excellent clarity and sound quality. Optional upgrade antenna increases range and provides for maximum transmission quality.
- 4 Each audience member uses their own receiver and headset and can quickly select channel and listen to their language clearly with individual volume level adjustment
- 5 Making equipment management and transportation easy this rugged military-grade case will keep your investment safe for years and years to come

Ask about our CUSTOM SOLUTION CASES

Take your system to a higher level of effectiveness by having your system mounted, pre-wired and ready for 1 minute setup and go!

This makes setting up and using your system as easy as 1-2-3. You can add microphones, transmitters, monitoring units and any number of drawers all in one easy-to-use transportable case.
